

Changemakers Masterclass Series 2026

Building leadership capability across
Tasmania's community services industry

TasCOSS's Changemakers Masterclass Series brings together expert facilitators and industry leaders to build capability where it matters most.

Each masterclass focuses on a critical area of contemporary leadership – from AI and anti-racism to managing burnout, building partnerships and engaging the media. The masterclasses are grounded in real-world practice and designed for the realities of leading Tasmanian community services in 2026.

Masterclasses can be taken individually or as a series, allowing participants to tailor their learning to their role, priorities and stage of leadership.

2026 Changemakers Masterclass Series
